

Making the complex simple.

Intelligent software for the international energy and utilities markets.

Simplify the quote-to-contract journey with a self-serve solution

UD portal

- Create automated quotes and contract with internal compliance verification
- Enable suppliers to increase their network and sales channels
- Reduce cost to serve by providing brokers with a self-serve solution
- Integrate with existing enrollment and billing system
- Validate multi utility supply points to improve data accuracy and minimize contract rejections
- Generate quotations based on matrix and live market prices
- Incorporate added value services within supply offering
- Supply contract acceptance via DocuSign, PDF and verbal script
- Perform credit checks at point of sale via an API
- Add and manage commissions, incorporating each supplier's own rules
- Report business and renewals in real time
- User-friendly dashboard
- Intuitive navigation
